OUTLINE

SOCKET TYPES

PRODUCT FEATURES

- glare suppressed product
- Working time
- cut-out size in mm
- type of chip
- built in LED light source
- number of connectors
- from the viewpoint of logistics, the product is of XL size
- product equipped with motion sensor
- RGB
- RGB+white
- remote controllable
- adjustable colour temperature
- GU10 socket
- E27 socket
- modes of lighting
- instant full brightness
- IP protection degree of product
- dimmable
- non-dimmable
- temperature-display
- alarm function
- calendar function
- colour of product
- operates with a LED fluorescent lamp
- operates with a light source with screw fitting
- operates with a GU10 light source
- light direction
- Smart device controllable
- product equipped with a IP68 quick connector
- touch-controlled RGB ambient light

end of life: the product is available in a limited quantity only and there will be a replacement product

FILAMENT BULBS

In comparison with LED technology, in case of filament products, chips are placed on separate, transparent columns and are coated with phosphor. These are professionally designed light sources, they are efficient and can create a unique and special atmosphere in your home.

JUMBO/SOFT FILAMENTS

In comparison with LED technology, in case of filament products, chips are placed on separate, transparent columns and are coated with phosphor. These are professionally designed light sources, they are efficient and can create a unique and special atmosphere in your home.

FLOOR LAMPS

An important criterium of a standing light is to fit the interior furnishing, the style of the room, or even to shape it and at the same time to be practical in its functionality. The standing lights available in our assortment are characterised by modern, cleared up design. They have a long product lifespan equipped with integrated LED with available in warm white colour temperature and in CCT design that is their colour temperature can be adjusted by means of the remote controller.

WATER-RESISTANT CEILING LIGHTS

The ceiling lights equipped with splash-proof IP protection are exquisitely suitable both for indoor and outdoor use. They are an ideal choice for the illumination of bathrooms, garages, cellars and gardens. Thanks to their high IP protection degree they can be widely applied, almost anywhere.

DESIGN OYSTERS

With our Design Oyster ceiling lights you can bring a unique, yet sophisticated style to your home. Three lighting modes are available for each type. The first and second modes use a combination of warm white and cold white LEDs to achieve different lighting effects, while the third mode uses warm white and cold white LEDs simultaneously to create a natural white color temperature, doubling both power and brightness.

MINI DESIGN OYSTERS

Mini Design Oysters have a wall-mounted design with three lighting modes that can be changed by toggling the wall switch on and off. They are available in a variety of unique designs. They are practical and at the same time they are excellent for decorating and defining the style of the interior of the home.

LED-STRIPS

LED STRIP 220V

Avide 220V single-color LED strips are available in 50-meter rolls and can be operated from network. Due to its IP67 protection and silicone coating, it can also be used outdoors and is easy to clean. Recommended for decorative lighting, Christmas lighting, or even billboard decoration.

The product can be cut per meter. To avoid electric shock after cutting, and to keep the tape waterproof, it is mandatory to use an end cap, which is recommended to be attached to the silicone LED tape with a waterproof (transparent) adhesive.

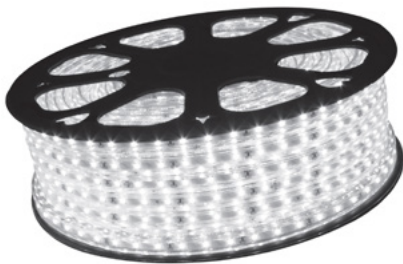

Controller is not needed if you want to use the LED strip in fixed brightness mode. In this case, it is sufficient to use the power supply that is included in the packaging. In order to be able to control the brightness and the lighting mode it is necessary to use a controller.

Available models:

- With natural white color temperature, SMD3528 chip, 4.8W / meter
- With natural white color temperature, SMD5050 chip, 14.4W / meter

Besides this, RGB color variations and 50m packaging.

POWER SUPPLIES

A power supply is essential to operate the LED strips. Power supplies are available in a wide range of designs and performance, and are available in stabilized 12V and 24V DC operation, from 24W up to 400W.

ALU PROFILES

Aluminium profiles can be used in many areas of lighting technology, making it easy to install, route or hide LED light sources. In addition to the wall-mounted version, we also offer corner profiles, recessed wall profiles, recessed floor profiles, bendable profiles and waterproof profiles.

FLOOD LIGHTS

Reflectors are a popular light source for both industrial and domestic applications due to their wide range of usages. From powerful floor-mounted work lights to those with surface-mounted motion sensors, they all offer efficient operation and long-lasting durability.

OUTDOOR LAMPS

Illuminate your garden with outdoor standing lights or make orientation-finding easier by means of the wall-mounted design. And you can make walking safer if you install lights in the stairs. Besides their modern appearance, they are characterised by robustness, therefore, they can be used on the long run. They operate mostly with integrated LED light sources but there are designs with E27 and GU10 bases.

GU10 FRAMES

Spot luminaires are available in a variety of colours and shapes to ensure the widest possible range of applications. Swivel head and fixed frames are available to meet all application needs, making them a suitable alternative to conventional solutions when combined with our LED spot light sources.

SPOTS

Spot lamps can be recessed into suspended ceilings and can be fixed easily. The internal part of the frame can be tilted, thus the light of the installed lamp can be directed in the preferred angle for maximum light utilization. Its light is directed, it is emitting light at an angle of 38° in a focused way. It is also ideal for lighting up narrower spaces, including kitchen counters and cabinets with a mirror. Spots are available in both round and square form.

LED PANELS

Built-in and surface-mounted designs are equipped with integrated SMD chips, therefore their use combines low energy consumption with high light utilisation. Besides application at home, they can be used in many areas. Thanks to their outstanding efficiency and power, LED panels are extremely popular in office spaces, retail units, schools or hospitals. They are available in various sizes and power levels in built-in and wall-mounted designs.

LED PANELS

Built-in and surface-mounted designs are equipped with integrated SMD chips, therefore their use combines low energy consumption with high light utilisation. Besides application at home, they can be used in many areas. Thanks to their outstanding efficiency and power, LED panels are extremely popular in office spaces, retail units, schools or hospitals. They are available in various sizes and power levels in built-in and wall-mounted designs.

LED TUBES

LED fluorescent tubes offer solution to replace conventional fluorescent tubes. Their brightness surpasses even that of neon tubes, their consumption is measurably lower. Integrated LED fluorescent tubes are flicker-free and they illuminate at their full brightness once switched on.

TRI-PROOF FIXTURES

Due to their IP65 protection degree, these luminaires are fully protected from dust and vapour, thus, they have a high degree of protection against entry of vapour, dust and other solids. They are recommended for the illumination of industrial halls, storage rooms, corridors, workshop rooms or cellars.

STREET LAMPS

LED street lamps are one of the newest street lighting solutions. The entry-level models with COB chips as well as the professional modular models with SMD chips are all suitable alternatives to conventional luminaires due to their energy efficiency and light output.

**LED STREET LAMP COB**

30W | 2 700lm | 100-240V | 130° | 50 000h | 172x400x60mm

ASLCNW-30W
